Details

The H10 Series is a high performance hearing protector and has been developed for use in extremely noisy environments. The protection is based on a technology with a double casing minimising resonance in the casing giving optimum high-frequency attenuation. An acoustic connection between the inner and outer casings provides

maximum low-frequency attenuation. The sealing rings are broad and filled with soft plastic foam for the best fit and low contact pressure.

The sealing rings are broad and filled with soft plastic foam for the best fit and low contact pressure.

- Represents the ultimate in earmuff technology by combining extreme noise protection with exceptional wearer comfort
- Available in headband, neckband & helmet attachment format
- Patented liquid & foam filled cushions provide a quality noise seal with low pressure for all day wearer comfort
- Stainless steel headband wired with four point suspension helps distribute cushion pressure evenly & earmuffs pivot for consistent fit

Suggested Applications

- General Industry
