Overview

Nylon Padlocks from Brady® have nonconductive fiberglass-reinforced nylon bodies and unique key cylinders that prevent electricity from traveling from the shackle to the key.

- Extremely compact and lightweight - compact nylon padlocks from Brady® are the smallest nylon locks on the market
- These lightweight padlocks comply with all OSHA requirements and offer superior temperature, chemical and corrosion resistance
- Non-conductive nylon padlocks are a safer alternative to metal locks for lockout applications
- Each padlock is keyed differently with keys precision-machined to exacting standards, so that the key for one lock will not open another in the set
