## Details

The H6 Series is specially engineered for high comfort and continuous wear. They provide effective noise protection for daily exposures up to 104dB. The foam sealing rings provide a quality noise seal with low pressure for all day wearer comfort.

In noisy environments up to 95 dB.

- Low profile design earmuffs specially engineered for high comfort & continuous wear
- Available in headband, neckband & helmet attachment formats
- Patented liquid & foam filled cushions provide a quality noise seal with low pressure for all day wearer comfort
- Stainless steel headband wired with four point suspension helps distribute cushion pressure evenly & earcups pivot for consistent fit

*Suggested Applications*

- General Industry
